Curriculum Highlights

Grade 6

Grade 6 is divided into teams. Students will receive core instruction from their team teachers. Exploratory classes are taught by faculty experienced in working with sixth graders.

Students will be placed on each team in a manner that will provide the highest quality and equitable education for all Northfield Middle School sixth graders. Many factors will be considered when placing students. Information received from fifth grade teachers, parent requests based on educational needs, equal placement of students with special needs, gender, and ability level will all be factors considered.

An example of a sixth grade schedule:

- Period 1 Core class: math
- Period 2 Core class: social studies
- Period 3 Explore 6 and physical education
- Period 4 Core class: science/health
- Period 5 Core class: reading
- Period 6 Core class: writing
- Period 7 Music electives, study halls, and/or Amistades 6

The following course descriptions are subject to change.

Required Classes

Math 6A: This course covers the 6th grade Minnesota math standards.

Math 6AA: This course also covers the 6th grade Minnesota math standards at a faster pace than Math 6A. Advanced topics will be explored after covering the Minnesota 6th grade standards. This course will often have larger and more challenging assignments than Math 6A.

Supplemental grade 6 math resource: All 6th grade math students will use the online program Imagine Math in addition to their regular curriculum.

*7th grade math placement will be determined in the spring of 6th grade based on performance in Math 6, MCA and STAR scores, and Imagine Math pathway progress.

Reading: Students receive instruction through the Reader's Workshop model. Lessons focus on elements of literature, word analysis/vocabulary acquisition, and comprehension strategies. Independent reading is also a critical component of this class. A variety of texts are used including fiction and nonfiction literature, poetry, and student-selected independent reading materials.

Supplemental grade 6 reading resource: All 6th grade reading students will use the individualized, online program Reading Plus in addition to the regular curriculum.

Social Studies: It's all about Minnesota in 6th grade Social Studies! Students study history, geography, civics and economics through the lens of Minnesota's past and present, learning how these disciplines work together to tell the story of Minnesota and its people. Our text, *Northern Lights: The Stories of Minnesota's Past*, provides accounts of real people who transformed, and have been transformed by, the place we call Minnesota. These stories include triumph, injustice, perseverance, heartbreak and ingenuity. Learning our state's history helps students to connect stories of themselves and their communities to the larger world, preparing them for the study of broader historical topics in the years to come.

Science/Health: Science units that are taught include atoms, matter, energy, sound, light, forces, and motion. There is also a focus on engineering. The Harcourt Science series is used as the basic primary text for this class. In Health we will be teaching Social Emotional Learning through the Second Step Curriculum. 5 Units will be taught throughout the year. The units include: Empathy and Communication, Bullying Prevention, Emotion Management, Problem Solving, and Substance Abuse Prevention. Students will have homework links that will focus on student/parent interaction.

Writing: Sixth Graders will develop writing skills through various types of prose and poetry. These include narrative, informative, and argumentative writing, poetry writing, and more! Sixth Graders will learn and use the writing process including prewriting, drafting, revising, editing, conferencing, publishing, and sharing/presentation. Sixth Graders will apply the writing components of ideas, organization, word choice, sentence fluency, and conventions.

Physical Education: This course meets every other day all year. Students will be participating in individual sports (tennis, badminton, ping-pong, weightlifting and other recreational activities), and team sports (football, volleyball, basketball, floor hockey, soccer, speedball, and softball). Students should change into clothes that allow them to move comfortably and are appropriate for the weather. A locker with a lock will be assigned to each student.

Explore Art 6: Students will be exposed to a wide range of art concepts and materials. Students will have the opportunity to create 2-dimensional and 3-dimensional artwork incorporating the elements and principles of art. Students' skill set will be expanded through drawing, painting and sculptural experiences. Academic productivity skills utilizing student iPads, Schoology, Notability and Google Drive will be embedded at intervals throughout the school year.

Elective Classes

Amistades 6: Students who were in the Compañeros program in elementary school may enroll in the Amistades 6 elective. Amistades 6 is not an immersion course, but rather a one-period elective class (this class meets on an every-other-day schedule), in which students study Spanish language and culture. Students who complete Amistades 6 will be eligible to enroll in the Amistades 7 course in seventh grade. **Prerequisite:** Participation in Compañeros or a similar program in another school system.

Orchestra: Sixth grade orchestra meets for a full year on alternating days. The class is designed to be a learning experience as well as a time for preparing for performances. Students learn and review scales, etudes, rhythmic patterns and study music in a variety of styles. Scheduled orchestra lessons are part of this program. Evening concerts are presented during the school year.

Prerequisite: Students with at least one year playing experience in orchestra are welcome to register. Students interested in beginning a stringed instrument should meet with the instructor.

Choir: Sixth Grade Choir is for students with any level of experience and skill in singing. This vocal music course is for students who have a desire to learn, sing and perform music. Students will learn the fundamentals of music, develop more independence in learning and singing music, become more confident singers and develop a deeper appreciation for music. Choir is a year-long class with stage performances and events throughout the school year! Our 6th Grade Choir performs at evening concerts, Winter Walk, and the District Choral Festival, which takes place during the school day. We also collaborate with the high school choirs, elementary choirs and other guest musicians. Choir is a great place to make new friends. Both beginners and experienced singers are always welcome. If you have any questions about choir at NMS please contact Ms. Michelle Bendett at mbendett@northfieldschools.org.

Band: Sixth grade band meets for a full year on alternating days. Emphasis is placed on basic music theory and techniques. Evening concerts are presented throughout the year with a variety of styles of music being presented. Scheduled band lessons are part of the program. Students are expected to stay in band for the entire year. Students are expected to practice at least 60 minutes per week in addition to the full band rehearsals. If you took a year off from band or delayed joining band due to the pandemic or any other reason, please join us!! We would love to have you and will do everything we can to help you catch up to your classmates.

Prerequisite: Successful participation in fifth grade band is desired. If the student decides to switch instruments after the end of the fifth grade school year, please contact the middle school band instructor. Students having no prior band experience are welcome to contact the director to begin lessons on a band instrument. These students will be included in band rehearsals after they have gained sufficient technique on their band instrument. The percussion (drum) section and saxophone sections are typically at capacity and not available to students beginning or switching instruments in sixth grade.

Drop/Add Policy: Withdrawal from courses requires parental and teacher consent. Transfer requests will generally only be approved when moving from a larger section to a smaller section.
