

Policy 524.2 USE OF TECHNOLOGY AND TELECOMMUNICATION SYSTEMS BY STUDENTS

I. PURPOSE

The Northfield School District provides technology and telecommunications resources for district students to support and enhance student learning. Access to and use of technology resources for students and employees is a fundamental part of education. This policy covers district student use of all technology and telecommunications resources in the district. The purpose of this policy is to govern and guide the appropriate use of these resources.

II. GENERAL STATEMENT OF POLICY

The district provides students with access to computers and peripherals, district networks, on campus and hotspot Internet access, software applications and other technology services in order to support and enhance student learning and to prepare them for work and life.

III. ACCEPTABLE/UNACCEPTABLE USES

1. Each student shall act responsibly when utilizing technology resources.
 - a. The use of the school district networks/computers/peripherals and internet/software applications and systems is a privilege that can be revoked at any time for abusive behavior. All activity and utilization of district technology resources must comply with Student Citizenship Handbook and school board policies.
 - b. While not an exhaustive list, students will not:
 - Use district technology resources to access, review, display, store, upload, download, distribute, post, receive, transmit, or print pornographic, obscene or sexually explicit materials or language, or other visual depictions that are harmful to minors.
 - Use district technology resources to access, display, store, upload, download, distribute or print materials that advocate violence, harassment or discrimination (hate literature) or are disruptive in any way.
 - Send abusive, intimidating, harassing, or unwanted material causing the work of others to be disrupted.
 - Use the district technology resources to vandalize, damage or disable the property of another person, will not make deliberate attempts to degrade, vandalize or disrupt equipment, software, or system performance, will not violate the network's security in any way, and will not use the school district network/Internet/email system in any way so as to disrupt the use of the system by other users.
 - Use district technology resources to gain unauthorized access to resources, passwords, accounts, information or files without direct permission from the district.
 - Use district technology resources to violate copyright laws, download or pirate software or plagiarize information, or engage in any illegal act or violate any local, state, or federal statute or law.

- Send or forward unnecessary or frivolous emails or messages in any quantity to other users of the district email system or other digital applications. Transmission of chain letters and pyramid schemes is strictly prohibited.
 - Use district technology resources for commercial purposes, political lobbying or solicitation of any kind.
 - Use non-district owned equipment or devices to access networks and file servers that require district-provided credentials.
 - Use district technology resources to communicate under a false name or designation or a name or designation they are not authorized to use, including instances in conjunction with representing that they are somehow acting on behalf of or under the auspices of the school district.
 - Use the name “Northfield Public Schools” in any form or use any symbol or logo or graphic used by Northfield Schools without the district’s prior consent.
 - Utilize the district system to post personal information about a user or another individual on social networks, including, but not limited to, social networks such as Facebook, Twitter, Instagram, Snapchat, TikTok, Reddit, and similar websites or applications.
- c. Students will use electronic information resources in compliance with all existing school board policies. Non-district owned equipment may access district guest networks but must comply with school district policy and procedures.
2. Each student shall respect private passwords, copyright and other intellectual property rights.
- a. Copying of data, files or using passwords belonging to others will be considered a violation of school district policies, a violation of law, and may constitute fraud, plagiarism or theft.
 - b. Software licensed by the district must only be used in accordance with applicable license specifications and agreements. Illegal copying and/or installing of software on district computers is strictly prohibited. Illegal copying and/or installing of district licensed software on personal devices is strictly prohibited.
 - c. Modifying or damaging information without authorization including but not limited to altering data, introducing viruses or damaging files or data is unethical and a violation of school district policies.
3. Each student shall abide by security restrictions on all systems and information.
- a. Distributing or making your password or another person’s password or access code available to others or otherwise attempting to evade, disable or “crack” passwords, desktop security systems, or other security precautions, or assisting others in doing so threatens work, privacy and the integrity of school district information, and is a serious violation of school district policy.
 - b. Attempts to “bypass” virus protection software on workstations or servers are violations of district security procedures.
 - c. Software or applications are generally installed by District technology services staff. Software or applications may only be installed by students with specific permission from the District.

4. Each student shall recognize limitations to privacy and use of electronic communications. Employees, staff and students do not own district technology and telecommunications equipment or software. The school district reserves the right to access user files at any time to protect the integrity of the systems and property of the district.
 - a. The district may examine or make copies of files that are suspected of misuse, or that have been corrupted or damaged. Files may be subject to search by law enforcement agencies if files contain information, which may be used as evidence in a court of law.
 - b. An individual investigation or search will be conducted if school authorities have a reasonable suspicion that the search will uncover a violation of law or school district policy. The school district will cooperate fully with local, state and federal authorities in any investigation concerning or related to any illegal activities and activities not in compliance with school district policies.

5. Each student shall be aware that data and other materials in files maintained on school district property or hosted solutions licensed by the district may be subject to review, disclosure or discovery under State and Federal legislation, including the Minnesota Government Data Practices Act.
 - a. The district can and will monitor the online activities of all employees and students, and employ “filtering” protection measures during any use by employees and/or students. The “filtering” measures are intended to block Internet sites that contain violent, obscene, pornographic or sexually explicit materials. The district will comply with any and all state and federal requirements around Internet filtering for student use. The use of this software does not guarantee that students or staff will not be able to obtain objectionable or pornographic materials over the Internet, but the chances have been minimized.
 - b. It is mandatory that staff closely monitor and supervise student use of the Internet and all other technology resources at school to ensure appropriate, educational use.

6. The school district has a special interest in regulating off-campus speech that materially disrupts classwork or involves substantial disorder or invasion of the rights of others. A student or employee engaging in the foregoing unacceptable uses of the internet when off school district premises also may be in violation of this policy as well as other school district policies. Examples of such violations may include, but are not limited to, serious or severe bullying or harassment targeting particular individuals, threats aimed at teachers or other students, failure to follow rules concerning lessons, the writing of papers, the use of computers, or participation in other online school activities, and breaches of school security devices. If the school district receives a report of an unacceptable use originating from a non-school computer or resource, the school district may investigate such reports to the best of its ability. Students or employees may be subject to disciplinary action for such conduct, including, but not limited to, suspension or cancellation of the use or access to the school district computer system and the internet and discipline under other appropriate school district policies, including suspension, expulsion, exclusion, or termination of employment.

IV. PARENTS' RESPONSIBILITY; NOTIFICATION OF STUDENT INTERNET USE

Outside of school, parents bear responsibility for monitoring their student's use of the school district system and of the Internet if the student is accessing the school district system from home or a remote location.

Parents may have the right at any time to investigate or review the contents of their child's files and email files in accordance with the school district's Protection and Privacy of Pupil Records Policy. Parents have the right to request the termination of their child's individual account at any time.

Policy 524.2 Use of Technology and Telecommunications Systems by Students

Adopted: 04.13.1998; Revised: 07.19.2001, 05.10.2004, 06.10.2013; Updated: 03.09.2020, 09.27.2021; Statutory Update: 02.14.2022
